SARAH JOHNSON
Web Developer

OVERVIEW

A web developer with a unique blend of artistic passion and engineering expertise, adept at web development. Backed by a background in customer service and administrative roles, excelling in computer proficiency, data interpretation, problem-solving, and collaborative work.

PROJECTS

HorrorFlix

- Created a nonrelational database of horror movies from several subgenres.
- Built an API with using Node.js and Mongoose to pull from this database.
- Developed a website using React that allows users to find horror movies to watch and save their favorites to their profile.
- Tested with Postman and deployed with Heroku.

Make 'Em Eat Recipe App

- Built a website using Django that allows users to view family recipes, see information for each recipe, view tables according to difficulty level, and read family stories.
- Deployed to Heroku and used AWS for media file storage.

WORK EXPERIENCE

Empyrean Benefits Solution Benefits Administrator
09/2021–05/2023

- Utilized problem solving skills along with active listening and multi-tasking to assist customers with their benefits, leave, and payroll.

GEICO Administrative Assistant
10/2020–09/2021

- Refined administrative work such as calendar maintenance, inventory and ordering, expense management, scheduling, payroll, and office management with Microsoft Excel.
- Demonstrated successful time management by also assisting with reception, customer service, policy change processing, and customer retention program management.

Jersey Mikes Assistant Manager
04/2019–10/2020

- Oversaw my team with duties such as inventory and ordering, shift and schedule management, employee training, shift leading supervision, and customer service.
- Demonstrated exemplary leadership, collaboration, and team building.
